

A Personalized Healing Approach

Orlando Wound Institute is dedicated to comprehensive, patient centered wound healing and limb salvage.

Our team specializes in treating wounds that have resisted standard care. We don't just evaluate your wound, we assess all underlying conditions that could affect the normal progression of healing.

After a thorough evaluation, our team will create a personalized treatment plan that addresses any barriers to healing and outlines the most appropriate advanced dressings and treatments.

We regularly communicate with your primary care physician to

About Florida Wound Care Doctors

Founded in 2000, Florida Wound Care Doctors is the only full-time wound care practice in Central Florida. Florida Wound Care Doctors founder and CEO, Walter A. Conlan III, MD, CWSP, UHM, holds board certification in Undersea and Hyperbaric Medicine (UHM) and is one of only 500 Certified Wound Specialist Physicians (CWSP) in the country. He is past president of the American Board of Wound Management (2012-14) and serves as the medical director of several local wound centers. In Florida Wound Care Doctors, he has put together a multidisciplinary group of highly skilled providers, dedicated to comprehensive, patient centered wound healing and limb salvage.

Restoring the best possible function and quality of life to our patients through coordinated care, early intervention, education and advanced technologies.

Orlando Wound Institute seeks to increase access to quality wound care for those suffering from non-healing wounds in Central Florida.

Who Can Benefit From Specialized Wound Care?

There are many factors that can affect wound healing. Anyone with a wound that is not healing properly, can benefit from specialized wound care.

Certain conditions such as diabetes, poor blood flow, problems with swelling or other chronic conditions can make wound healing more difficult.

Early intervention by a wound specialist helps prevent serious complications such as infection and amputation and restores quality of life to those who suffer from wounds.
